

Project Documentation Summary

Purpose

The documentation phase organizes all project information into a clear, structured report that explains the development and implementation of ComicCraft.

Documentation Activities

Requirements, design decisions, implementation details, testing observations, and user guidance were compiled and reviewed for accuracy and consistency.

Organization of the Report

The report was arranged into logical chapters including introduction, methodology, system design, development, testing, results, and conclusion for easy understanding.

Quality Assurance

Formatting, grammar, screenshots, figures, and references were checked to ensure the document is professional and submission-ready.

Benefits

Well-prepared documentation supports future maintenance, helps evaluators understand the project, and serves as a reference for further enhancements.

Summary

The documentation process successfully captured every important aspect of ComicCraft, making the project easy to understand, present, and maintain.
